

PURASKRIT

Front-End Developer - React & Next.js

puraskritsinha3@gmail.com | +91 7870707877 | LinkedIn: linkedin.com/in/puraskrit-94b155171 | GitHub: github.com/puraskrit7 | Gurugram, India
Portfolio: puraskrit7.github.io/portfolio

SUMMARY

Front-End Developer with 5.5+ years of experience architecting and delivering scalable web applications across Industrial IoT, telecom, e-commerce, and retail domains. Deep expertise in React 18 and Next.js (App Router, SSR, SSG), TypeScript, and GraphQL, with a strong track record of leading front-end teams, driving performance improvements, and establishing reusable component systems adopted across multiple product lines. Comfortable owning the full front-end delivery lifecycle - from architecture decisions and API design collaboration to code reviews, CI/CD, and production releases.

EXPERIENCE

Deloitte, Noida Consultant - Front-End Developer	Mar 2026 - Present
Industrial IoT Domain React 18 Vite Tailwind CSS TypeScript TanStack Query AWS GitHub Copilot AI Tools - Owning front-end architecture for an Industrial IoT platform - defining component structure, state management patterns, and coding standards adopted by the full team. - Designed and built a library of 10+ production-grade UI components in React 18 and Tailwind CSS, built for reuse across multiple IoT dashboard modules. - Introduced GitHub Copilot and AI-assisted workflows into the team's development process, reducing scaffolding and boilerplate time by ~20% and freeing the team to focus on business logic. - Leading all front-end releases across dev, staging, and production environments - coordinating deployment windows, managing rollbacks where needed, and keeping CI/CD pipelines healthy. - Running regular code reviews with a focus on maintainability, bundle size, and long-term scalability; established PR standards and review guidelines now used across the project.	Mar 2026 - Present
Accenture, Gurugram Product Engineering Senior Analyst	Feb 2021 - Feb 2026
Telecom Domain Next.js React TypeScript Redux REST GraphQL AWS Jenkins - Took ownership of the customer-facing front-end for a UK telecom platform with 2M+ active users - covering product journeys, plan selection, and account management flows. - Architected location-aware product journeys in Next.js SSR with pincode-based pricing logic and real-time offer personalisation, working closely with backend teams on API contracts. - Rebuilt KYC, billing, and onboarding UIs with improved form validation and error handling, which reduced customer drop-off during onboarding by ~18%. - Integrated complex CRM and subscription management workflows, handling edge cases around plan upgrades, downgrades, and mid-cycle changes with clean state management in Redux. - Drove day-to-day front-end delivery for a team of 6; ran code reviews, unblocked junior developers, and introduced patterns around API error boundaries and loading state consistency.	Feb 2024 - Feb 2026
E-Commerce Domain Next.js React GraphQL React Query Redux TypeScript AWS Jenkins - Led front-end development for cart, checkout, wallet, voucher, and subscription flows on a high-traffic e-commerce platform - owning both architecture and delivery across 5+ product modules. - Achieved ~35% improvement in frontend performance by introducing code splitting, lazy loading, React Query caching strategies, and eliminating redundant API calls identified through profiling. - Migrated data-fetching layer from REST to GraphQL with React Query, significantly reducing over-fetching and improving perceived load speed on product listing and order pages. - Optimised Core Web Vitals (LCP, CLS, FID) using Next.js image optimisation and prefetching; validated across Chrome, Firefox, Safari, and Edge to ensure consistent cross-browser behaviour. - Established CI/CD pipeline standards for front-end deployments on AWS CloudFront via Jenkins, reducing deployment failures and making rollbacks predictable and fast.	Feb 2022 - Feb 2024
Retail Domain React JavaScript SCSS REST Material UI - Built and maintained product listing, catalogue, and search UIs for a retail platform with 50K+ SKUs - handling complex filtering, multi-level sorting, and server-side pagination at scale. - Developed a shared React component library of 30+ components (data tables, filter panels, modals, forms) that cut feature delivery time by ~25% and became the standard across retail squad teams. - Improved page load time by ~30% through render optimisation, debounced API calls, image lazy loading, and reducing unnecessary re-renders identified through React DevTools profiling. - Contributed to Agile ceremonies, led sprint-level front-end planning, conducted peer code reviews, and helped build out Jest unit test coverage from near zero to meaningful coverage across core modules.	Feb 2021 - Feb 2022

SKILLS

Languages:	JavaScript, TypeScript (ES6+)
React:	React 18, Redux, Hooks, Context API, React Query, TanStack Query, Component Architecture, SPA, Jest
Next.js:	Next.js 13/14, App Router, SSR, SSG, ISR, Image Optimisation, Webpack
Styling:	HTML5, Tailwind CSS, SCSS, CSS3, Material UI, Responsive Design, Cross-Browser Compatibility
APIs & Data:	REST, GraphQL, Firebase, Pagination, Caching, Debouncing
Tools:	AWS (S3, CloudFront), Vite, Git, Jenkins, CI/CD, Figma, GitHub Copilot, Agile, Scrum

EDUCATION AND ACHIEVEMENTS

B.Tech - Computer Science and Engineering Shaheed Bhagat Singh State Technical Campus, Punjab 2016 - 2020	- Ace Award (2022, 2023) - Innovation and Leadership, Accenture - iChamp Award (2023) - Frontend Performance Optimisation, Accenture - Client Recognition (2024) - Onshore Excellence, Accenture - Certifications: Advanced JavaScript, React Professional
